

# Case Study

## New Build Home London

### Our Client

Newcross Construction Ltd.

### Sector

Residential sector

### Service and Products provided

- Cills
- Heads
- Jambs
- Mullions
- String course
- Window surrounds

### The Project

An unusual new house build which essentially extended an existing terrace block, with our cast features being prominent throughout.

### The Results

There was an obvious need to exactly replicate the architectural features on the existing properties, and for this we carefully took dimensions and profile details from them. From there, it was a case of creating CAD drawings for each item, with our skilled joiners then making exact moulds ready for the production process
